

DuPont™ ForeverLawn®

Select Synthetic Grass

The future of synthetic grass is here.

Innovative Memory Fiber™ yarn offers exceptional resiliency

Advanced technology resists fracturing and breakdown

Innovative geometric shape for incredible grass-like performance

Unique construction and blades provide remarkable realism

Textured thatch zone adds natural look, fullness, and consistency

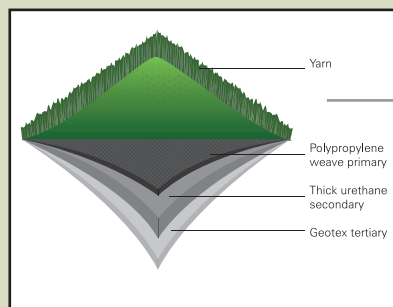

Proprietary multi-layered backing system provides incredible stability and durability

MEMORY FIBER™ YARN

DuPont™ ForeverLawn® Select Synthetic Grass features a unique Memory Fiber™ yarn that provides improved durability, outstanding resiliency, and remarkable realism.

- Unique geometric shape for greater resiliency.
- State of the art resin to resist fracturing and breakdown.
- Incredible grass-like performance and appearance.

PREMIUM BACKING

DuPont™ ForeverLawn® Select Synthetic Grass is built on the most advanced, multi-layered backing system available.

- Proprietary backing system provides incredible stability.
- Blades are encapsulated in backing for enhanced durability.
- Made with post-consumer recycled materials from Project Yellowstone.*

UNIQUE CONSTRUCTION

These dense, durable construction of DuPont™ ForeverLawn® Select Synthetic Grass is built around an innovative tan and green thatch zone. The dual colored textured grass provides several unique benefits.

- Provides a natural, full appearance.
- Effective system for locking infill in place.
- Creates a more consistent surface.
